FFS-30 - HORIZONTAL FORM/FILL/SEAL

The ORICS Form/Fill/Seal system is an inline, intermittent motion sealing system that forms pouches and trays in realtime from rollstock film. By forming trays online, this system has the ability to save the user tens of thousands of dollars by eliminating the costs associated with purchasing and shipping pre-formed trays. What's more, with a simple tooling change, this flexible system is capable of creating multiple tray/pouch sizes and configurations.

The possibilities are limited only by your imagination!
