An index-motion, rotary tray sealer, the R-20 is the most popular machine for ready meal entrees and sides. Its modular design allows for expansion to a full production line, adding an in-feed conveyor, automatic transfer, fillers, depositors and denester.

With a maximum performance of 10 to 13 cycles per minute (20 to 26 packages), the affordable

R-20 is designed for medium-volume modified atmosphere packaging (MAP).
